SUBJECT INDEX

A

Acid, glucuronic, of leukocytes in health and disease, 134
P-sulfonamido-benzoic, as a diuretic agent, clinical experience with, 839
Acid-base pattern in renal hyperchloremic acidosis, 349
Acidity, gastric, correlated with quininium excretion, 343
Acidosis, diabetic, outcome of, comparative importance of severity and therapeutic effort in determining, 107
renal hyperchloremic, studies on, 347
ACTH, effect of, on copper metabolism in hepatolenticular degeneration, 779
on subcutaneous nodules of rheumatoid arthritis, 70
infusion in acute viral hepatitis, steroid excretion patterns in, 58
therapy in acute viral hepatitis, 48
Activity of proteolytic enzymes, measuring and recording, practical accurate method for, 327
Acute viral hepatitis, ACTH therapy in, 48
with and without adrenocorticotrophin infusion, steroid excretion patterns in, 58
Adrenalectomy, effect of, on capillary resistance and eosinophil level, 397
Adrenalin, hematologic response to, 386
Adrenocortical secretion of premature infants, corticosterone in, 831
Adrenocorticotrophin infusion in acute viral hepatitis, steroid excretion patterns in, 58
Adrenosteroidal compounds, transformations of, importance of liver in, 79
Adsorption and elution of Type C influenza virus, 34
Albumin, gamma globulins, and globulins of intermediate mobility, radioactive label of, persistence in blood of, studied with S_{35} and paper electrophoresis, 918
I^{131}-labeled and T-1824, artifactual differences in distribution of, resulting from mixing prior to administration, 215
Alcoholism, chronic, complicated by delirium tremens, magnesium deficiency after, 169
Alkalosis, hypokalemic, in rat, kidney changes in, 802
Altmann-Gersh freezing-drying apparatus, a simplified, 479
Alveolar carbon dioxide tension, indirect estimation of, 662
Amines, primary, studies on. II. Their natural occurrence in urine of normotensive and hypertensive subjects, 620
Amino acids, free, in blood plasma, paper chromatography of, 827
Aminopterin, effects of, on respiration and morphology of gastrointestinal mucosa in rats, 583
Amyloidosis, pathogenesis of, studies on. II. Effect of nitrogen mustard in inducing amyloidosis, 367
Anemia, acquired autoimmune hemolytic, intravascular agglutination of red cells in, 98
azotemia, and survival of bilaterally nephrectomized rabbits, effects of diets on, 113
iron-deficiency, bone marrow and liver in, 427
megaloblastic, nucleic acid composition of bone marrow in, effect of vitamin B_{12} and folic acid on, 905
pernicious, epithelial cells in, characteristic cellular changes in, 235
Animal experiments with Type C influenza virus, 35
Animals, metabolism cage for small, 824
Anthrone, determination of inulin in plasma and urine by, 475
Antibiotic susceptibility of Klebsiella (Kauffman), 707
Antibiotics, bacterial sensitivity to, paired in various concentration ratios, a strip-gradient method for in vitro assay of, 946
concentration of, in brain, 275
in serum and cerebrospinal fluid, 276
effect of, after injection of contaminated blood, 699
Antibodies, complement-fixing, stability of human, against lymphogranuloma venereum, psittacosis, influenza A, and influenza B antigens under various conditions of storage, 637
Antibody, hemolytic isoimmune, development of, 93
multiple, response to repeated transfusion, 93
response in epidemic parotitis following injection of mumps antigen in varying dosage, 647
Anticholinergic agents, comparative effects of newer, on human gastric secretion, 359
Anticoagulant acid citrate dextrose solution, blood treated with, comparison with blood decalcified by ion exchange resin, 184
Antigen, mumps, antibody response following injection of varying dosage of, in epidemic parotitis, 647
Antigens, lymphogranuloma venereum, psittacosis, influenza A, and influenza B, stability of human complement-fixing antibodies against, under various conditions of storage, 637

Antiglobulin test in diagnosis of hemolytic syndromes, 867
Anti-hemophilic globulin, plasma thromboplastin component, and plasma thromboplastin antecedent deficiency, relative incidence of, 860
Antrenyl in gastric secretion studies, 361
Apparatus, continuous intravenous infusion, for unanesthetized dog, 324
Aqueous solutions, freezing point of, instrument and method for, 310
Arterial blood, oxygen saturation of, determined by gasometric analysis, 791
Arthritis, rheumatoid, subcutaneous nodules of, effects of cortisone on, an evaluation of, 70
Assay, uropepsin, improved technique for, 165
Asthma, bronchial, ventilatory function in, effect of cigarette smoking on, 455
Atherosclerosis, time factor in, 914
Atropine in gastric secretion studies, 360
Aureomycin concentration in serum, cerebrospinal fluid, and brain, 277
Autoimmune hemolytic anemia, acquired, intravascular agglutination of red cells in, 98

B

B_{12} binding power in gastric juice, rapid method for determination of, 316
Bacteria, psychrophilic, role of, in contamination of biologic products, 411
Bacterial contamination of bank blood, experimental studies on. I. The nature of "toxicity" of contaminated blood, 696
sensitivity to antibiotics paired in various concentration ratios, a strip-gradient method for in vitro assay of, 946
BAL, effect of, on copper metabolism in hepatolenticular degeneration, 776
Bank blood, bacterial contamination of, experimental studies on. I. The nature of "toxicity" of contaminated blood, 696
Banthine in gastric secretion studies, 361
intestinal activity inhibited by, 452
Barrnett-Seligman reagent, colorimetric determination of protein-bound, water-insoluble sulfhydryl groups with, 957
Bicarbonate infusion in renal hyperchloremic acidosis, 353
Bifidus factor and blood group substances, enzymatic inactivation of, 543
Bilateral parotidectomy, effect of, on blood sugar levels in rat and mouse, 119
Bilaterally nephrectomized rabbits, effect of diets on anemia, azotemia and survival of, 113
Biologic products, missed contaminations in, 411
Blood, arterial, oxygen saturation of, determined by gasometric analysis, 791
bank, bacterial contamination of, experimental studies on. I. The nature of "toxicity" of contaminated blood, 696
citrated, massive transfusion of, circulatory derangement following, experimental studies of, 184
decalcified by ion exchange resin, comparison with blood treated with A.C.D. solution, 184
group mucoids, distribution and growth-promoting properties for Lactobacillus bifidus var. Penn, 532
substances and bifidus factor, enzymatic inactivation of, 543
lipoproteins in traumatic injury, 603
PBI^{131} in, determination of, simplified procedure for, 960
persistence in, of radioactive label of albumin, gamma globulins, and globulins of intermediate mobility studied with S_{35} and paper electrophoresis, 918
plasma, free amino acids in, paper chromatography of, 827
platelets, effects of massive gastrointestinal hemorrhage on, 501
serotonin activity in, 759
sugar, changes of, caused by quinoline derivatives, 377
levels, effect of parotidectomy on, in rat and mouse, 119
transfusions using plastic equipment, 196
treated with A.C.D. solution, comparison with blood decalcified by ion exchange resin, 184
volume determinations using I^{131} HSA, simplified technique for, 332
Body fluid, Clostridium Perfringens Lecithinase in, identification of, 962
fluids, levels of 17-hydroxycorticosteroids in, 874
Bone marrow and liver in iron-deficiency anemia, 427
in megaloblastic anemia, nucleic acid composition of, effect of vitamin B_{12} and folic acid on, 905
Brain, concentration of antibiotics in, 275
Bromsulphalein test and serum alkaline phosphatase determination in diagnosis of metastatic cancer of liver, value of, 741
Bronchial asthma, ventilatory function in, effect of cigarette smoking on, 455
Buffer infusion in renal hyperchloremic acidosis, 353

C

C^{14} labeled ethylenediaminetetraacetic acid, metabolism of, in human beings, 566
Cage, metabolism, for small animals, 824
Calcium, intravenous, metabolic effects of, 123

Caliper for measurement of skinfold thickness, an improved, 967
Cancer of liver, metastatic, serum alkaline phosphatase determination and bromsulphalein test in diagnosis of, value of, 741
Capillary resistance and circulating eosinophils, correlation between, 395
Carbon dioxide tension, alveolar, indirect estimation of, 662
Carbonic anhydrase, inhibitor, P-sulfonamido-benzoic acid, clinical experience with, 839
Carbo-resin in hepatolenticular degeneration, 778
Cells, epithelial, in pernicious anemia, characteristic cellular changes in, 235
strain HeLa human, application of, for isolation and typing of poliomyelitis viruses, 286
tagged with radioactive chromium, survival of erythrocytes estimated by means of, 717
Central Society for Clinical Research, presidential address, 26th annual meeting, Chicago, Ill., October 30, 1953, 3
Cerebrospinal fluid, antibiotic concentration in, 276
proteins in, paper electrophoretic estimation of, 785
Chemical specificity of diabetogenic action of quinoline derivatives, 375
Cholangiolitic hepatitis, ACTH therapy in, 55
Chromatographic changes in plasma I^{131} during treatment of Graves' and cardiac diseases correlated with clinical course, 553
Cigarette smoking, effect of, on ventilatory function in bronchial asthma and obstructive pulmonary emphysema, 455
Circulating eosinophils and capillary resistance, correlation between, 395
Circulatory derangement following massive transfusion of citrated blood, experimental studies of, 184
Clearing activity of plasma, heparin-induced lipemia, quantitative measurement of, 445
Clinical findings in pulmonary histoplasmosis, 669
Clostridium Perfringens Lecithinase in body fluid, identification of, 962
Coagulation factors in massive gastrointestinal hemorrhage, 511
Coccidioides immitis, sensitivity of, to 2-hydroxystilbamidine, and failure of drug in treatment of experimental coccidioidomycosis, 942
Coccidioidomycosis—possible fomite transmission, 633
Cold injury, massive hyperlipoproteinemia following, 603
role of, in contaminations in biologic products, 411
stress, effect of, on capillary resistance and eosinophils, 400
Colorimetric determination of protein-bound, water-insoluble sulfhydryl groups with Barrnett-Seligman reagent, 957
Complement-fixing antibodies, stability of human, against lymphogranuloma venereum, psittacosis, influenza A, and influenza B antigens under various conditions of storage, 637
Coombs antiglobulin test in diagnosis of hemolytic syndromes, 867
Copper metabolism, effect of drugs upon, in hepatolenticular degeneration and in normal subjects, 774
Correction factor for determination of twenty-four-hour urinary excretion values, 798
Corticosterone metabolism, human. IV. Probable predominance of corticosterone in the adrenocortical secretion of premature infants, 831
Cortisone, effects of, on capillary resistance and eosinophil level, 397
on subcutaneous nodules in rheumatoid arthritis, an evaluation of, 70
pretreatment, effect on toxicity of injected contaminated blood, 701
Creatine and creatinine in urine, determination of, 798
Cysteine, optical isomers of, in prevention of leukopenia induced by nitrogen mustard, 246
Cytology of degenerating leukocyte, 227

D

D-cysteine in prevention of leukopenia induced by nitrogen mustard, 246
Degenerating leukocyte, cytology of, 227
Delirium tremens, chronic alcoholism complicated by, magnesium deficiency after, 169
Densitometer, recording, semiautomatic, for use after paper-strip electrophoresis, 157
Diabetic acidosis, outcome of, comparative importance of severity and therapeutic effort in determining, 107
Diabetics, insulin-resistant, given intravenous fructose, metabolic observations in, 615
Diabetogenic action of quinoline derivatives, chemical specificity of, 375
Diagnex in determination of gastric secretory function, 340
Diameters, erythrocytic, measurement of, with phase microscopy, 212
Diets, effect of, on anemia, azotemia, and survival of bilaterally nephrectomized rabbits, 113
liquid and solid, variability of fecal nitrogen excretion with, 440
Dihydrostreptomycin concentration in serum, cerebrospinal fluid, and brain, 277
tuberculous meningitis treated with, 465
Dilution tubes in hemagglutination-inhibition test, determining proportional distances between, improved method for, 660

Diuretic agent, P-sulfonamido-benzoic acid, clinical experience with, 839
Drugs, effect of, on copper metabolism in hepatolenticular degeneration and in normal patients, 774
Drying apparatus for preservation of viruses, a small, 489
Duodenal mucosa of rats, effects of aminopterin on respiration and morphology of, 583
ulcer, urinary pepsinogen excretion in, 338

Iron, serum, in experimental hepatocellular necrosis, 572
Iron-deficiency anemia, bone marrow and liver in, 427
Irradiated dogs, effect of early exsanguinotransfusion on, 595

Isoimmune antibody, hemolytic, development of, 93
Isolation of Type C influenza virus, 33

J

Jaffe color reaction for determination of creatine and creatinine in urine, 798

K

Kidney changes in hypokalemic alkalosis in rat, 802
Kidneys, substances excreted by, determination of gastric secretory function by measurement of. I. Uropepsin excretion in health and disease, 335
II. An evaluation of the tubeless method of gastric analysis, 340
Klebsiella (Kauffman), antibiotic susceptibility of, 707
Kwashiorkor, enzyme activity and protein concentration in, 727

L

Laboratory methods, 157, 310, 463, 647, 824, 946
studies of pulmonary histoplasmosis, 669
Lactobacillus bifidus var. Penn, distribution and growth-promoting properties of blood group mucoids for, 532
L-cysteine hydrochloride in prevention of leukopenia induced by nitrogen mustard, 246
Lead poisoning, versene in treatment of, 780
Leocillin concentration in brain, 275
Letter from the editor, 1
Leukocyte, degenerating, cytology of, 227
response to adrenalin, 389
Leukocytes, glucuronic acid content of, in health and disease, 134
Leukopenia induced by nitrogen mustard, optic isomers of cysteine in, prevention of, 246
Levallorphan, effect of, on respiratory depression and analgesia of levorphan, 938
Levels of 17-hydroxycorticosteroids in body fluids, 874
Levorphan, respiratory depression and analgesia of, effect of Levallorphan on, 938
Liver and bone marrow in iron-deficiency anemia, 427
importance of, in transformations of adrenosteroidal compounds, 79
metastatic cancer of, serum alkaline phosphatase determination and bromsulphalein test in diagnosis of, value of, 741

M

Magnesium deficiency after prolonged parenteral fluid administration and after chronic alcoholism complicated by delirium tremens, 169
Malnutrition after trauma, effect of testosterone propionate at various protein and calorie intakes in, 732
enzyme activity and protein concentration in serum in, 727
Mannitol hexanitrate, effect of, on amine excretion, 621
Measurement of skinfold thickness, improved caliper for, 967
Megaloblastic anemia, nucleic acid composition of bone marrow in, effect of vitamin B_{12} and folic acid on, 905
Metabolic effects of intravenous calcium, 123
observations in insulin-resistant diabetics given intravenous fructose, 615
Metabolism cage for small animals, 824
corticosterone, human. IV. Probable predominance of corticosterone in the adrenocortical secretion of premature infants, 831
of C^{14} labeled ethylenediaminetetraacetic acid in human beings, 566
Methantheline bromide, break-through of intestinal activity from inhibition by, 452
Multiple antibody response to repeated transfusion, 93
Mumps, prophylaxis of; antibody response following injection of mumps antigen in varying dosage, 647
Muscular exercise, effect of forced, on capillary resistance and eosinophils, 400

N

Necrosis, hepatocellular, serum iron in experimental, 572
Neomycin, tuberculous meningitis treated with, 465
Neo-Penil concentration in brain, 275
in serum and cerebrospinal fluid, 276
Nephrectomy, bilateral, of rabbits, effect of diets on anemia, azotemia, and survival after, 113
Nitranitol, effect of, on excretory pattern of primary amines, 621
Nitrogen excretion, fecal, variability of, with liquid and solid diets, 440
mustard, effect of, in inducing amyloidosis, 367
leukopenia induced by, optical isomers of cysteine in, prevention of, 246
retention in malnutrition after trauma, 732
Nodules, subcutaneous, of rheumatoid arthritis, effects of cortisone on, an evaluation of, 70
Nucleic acid composition of bone marrow in megaloblastic anemia, effect of vitamin B_{12} and folic acid on, 905
Nutritional edema, enzyme activity and protein concentration in serum during, 727

O

Oliguric response to antidiuretic hormone in renal hyperchloremic acidosis, 350
Optical isomers of cysteine in prevention of leukopenia induced by nitrogen mustard, 246

Oxygen saturation of arterial blood determined by gasometric analysis, 791
Oxytetracycline, resistance and sensitivity of Endamoeba histolytica to, 713

P

Panagglutinin titers in infants and young children, 208
Paper chromatography of free amino acids in blood plasma, 827
  electrophoresis, persistence in blood of radioactive label of albumin, gamma globulins, and globulins of intermediate mobility studied with S_{35} and, 918
  electrophoretic estimation of proteins in cerebrospinal fluid, 785
Papers, scientific, publishing, 3
Paper-strip electrophoresis, semiautomatic recording densitometer for use after, 157
Parenteral fluid administration, prolonged, magnesium deficiency after, 169
Parotidectomy, effect of, on blood sugar levels in rat and mouse, 119
Parotitis, epidemic, prophylaxis of; antibody response following injection of mumps antigen in varying dosage, 647
Pathogenesis of amyloidosis, studies on. II. Effect of nitrogen mustard in inducing amyloidosis, 367
PBI^{131} in blood, determination of, simplified procedure for, 960
Penicillin in scarlet fever, comparison with erythromycin, 15
Pernicious anemia, epithelial cells in, characteristic cellular changes in, 235
Phase microscopy, measurement of erythrocytic diameters with, 212
Phosphin 3R, a water-soluble fluorochrome, demonstration of fat emboli in tissue sections with, 321
Pitressin, oliguric response to, in renal hyperchloremic acidosis, 350
Placebo in scarlet fever therapy, 17
Plasma and urine, inulin in, determination of, by anthrone, 475
  heparin-induced lipemia clearing activity of, quantitative measurement of, 445
  I^{131}, chromatographic changes in, during treatment of Graves' and cardiac diseases correlated with clinical course, 553
  sodium levels, simple indirect method for determining, 482
  thromboplastin component, anti-hemophilic globulin, and plasma thromboplastin antecedent deficiency, relative incidence of, 860
Plastic equipment, platelet transfusions utilizing, 196
Platelet transfusions utilizing plastic equipment, 196
Poliomyelitis viruses, propagation in vitro of, studies on. V. The application of strain HeLa human epithelial cells for isolation and typing, 286
Prantal in gastric secretion studies, 363
Precipitins in human histoplasmosis, 259
Premature infants, adrenocortical secretion of, corticosterone in, 831
Preservation of viruses, small drying apparatus for, 489
Presidential address, Central Society for Clinical Research, 26th annual meeting, Chicago, Ill., October 30, 1953, 3
Primaquine, hemolytic effect of. I. The localization of the drug-induced hemolytic defect in primaquine-sensitive individuals, 303
Primary amines, studies on. II. Their natural occurrence in urine of normotensive and hypertensive subjects, 620
Pro-Banthine in gastric secretion studies, 361
Procaine penicillin G concentration in serum, cerebrospinal fluid, and brain, 276
Procasenol in treatment of malnutrition, enzyme activity and protein concentration in serum during, 727
Profibrinolysin, estimation of, 495
Promizole, tuberculous meningitis treated with, 465
Propagation in vitro studies of poliomyelitis viruses. V. The application of strain HeLa human epithelial cells for isolation and typing, 286
Protein concentration and enzyme activity in serum in malnutrition, 727
Protein-bound iodine in thyroid therapy, 422
  water-insoluble sulfhydryl groups, colorimetric determination of, with Barrnett-Seligman reagent, 957
Proteins in cerebrospinal fluid, paper electrophoretic estimation of, 785
Proteolytic activity in plasma, determination of, 495
  enzyme activity, measuring and recording, practical accurate method for, 327
P-sulfonamido-benzoic acid, a diuretic agent, clinical experience with, 839
Psychrophilic bacteria, role of, in contamination of biologic products, 411
Publishing scientific papers, 3
Pulmonary emphysema, obstructive, ventilatory function in, effect of cigarette smoking on, 455
  histoplasmosis in a farm family: three-year follow-up, 669
Pyramin, determination of, 469

Q

Quininium excretion, gastric acidity correlated with, 343
Quinoline derivatives, diabetogenic action of, chemical specificity of, 375

R

Rabbits, bilaterally nephrectomized, effect of diets on anemia, azotemia and survival of, 113
Radioactive chromium, cells tagged with, survival of erythrocytes estimated by means of, 717
label of albumin, gamma globulins, and globulins of intermediate mobility, persistence in blood of, studied with S_{35} and paper electrophoresis, 918
Reabsorption of thiocyanate, renal, in normal man, 815
Realimentation, stress of, with carbohydrate or protein following prolonged fasting, analysis of, 888
Recording densitometer, semiautomatic, for use after paper-strip electrophoresis, 157
Red cells, intravascular agglutination of, in acquired autoimmune hemolytic anemia, 98
Renal hyperchloremic acidosis, studies on, 347
tubular reabsorption of thiocyanate in normal man, 815
Respiration and morphology of gastrointestinal mucosa of rats, effects of Aminopterin on, 583
Respiratory depression and analgesia of levorphan, effect of levallorphan on, 938
infections, erythromycin therapy of, 15
Rheumatoid arthritis, subcutaneous nodules of, effects of cortisone on, an evaluation of, 70

S

Scarlet fever, erythromycin and penicillin therapy, comparative efficacy of, 15
Scientific papers, publishing, 3
Sensitivity, bacterial, to antibiotics paired in various concentration ratios, strip-gradient method for in vitro assay of, 946
of coccidioides immitis to 2-hydroxystilbamidine and failure of drug in treatment of coccidioidomycosis, 942
of Endamoeba histolytica to Terramycin, 713
Serologic studies of Type C influenza virus with human sera, 38
tests for syphilis in infectious mononucleosis, 253
Serotonin activity in blood, 759
Serum albumin and washing, effects of, upon erythrocytes. I. Upon morphology as seen with phase microscopy and with polarized light, 518
II. Upon the internal movements of erythrocytes, 527
I^{131}-labeled and T-1824, artifactual differences in distribution of, resulting from mixing prior to administration, 215
Serum—Cont'd
alkaline phosphatase determination and bromsulphalein test, in diagnosis of metastatic cancer of liver, value of, 741
and urine, vitamin B_{12} in, studies following oral and parenteral administration, 143
antibiotic concentration in, 276
in malnutrition, enzyme activity and protein concentration in, 727
iron in experimental hepatocellular necrosis, 572
panagglutinin active against trypsinated human erythrocytes, studies on normal. III. Panagglutinin titers in infants and young children, 208
17-Hydroxycorticosteroids in body fluids, levels of, 874
Skinfold thickness, measurement of, improved caliper for, 967
Sodium and plasma electrolytes, total exchangeable, in renal hyperchloremic acidosis, 349
levels, plasma, simple method for determining, 482
Splenectomy, effect of, on results of adrenalin test, 390
Steroid excretion patterns in acute viral hepatitis, with and without adrenocorticotrophin infusion, 58
Storage of antigens, stability of human complement-fixing antibodies against various conditions of, 637
Strain HeLa human epithelial cells, application of, for isolation and typing of poliomyelitis viruses, 286
Streptococci, group A, sulfonamide resistance of, simplified method for testing, 280
Streptomycin concentration in brain, 275
tuberculous meningitis treated with, 465
Strip-gradient method for in vitro assay of bacterial sensitivity to antibiotics paired in various concentration ratios, 946
Subcutaneous nodules of rheumatoid arthritis, effects of cortisone on, an evaluation of, 70
Sulfhydryl groups, protein-bound, water-insoluble, colorimetric determination of, with Barrnett-Seligman reagent, 957
Sulfonamide resistance of group A streptococci, simplified method for testing, 280
Syphilis, serologic tests for, in infectious mononucleosis, 253

T

T-1824 and I^{131}-labeled albumin, artifactual differences in distribution of, resulting from mixing prior to administration, 215
Terramycin concentration in serum, cerebrospinal fluid, and brain, 277
sensitivity and resistance of Endamoeba histolytica to, 713

Testosterone propionate, effect of, at various protein and calorie intakes in malnutrition after trauma, 732
Thermogenic response to intravenous fat emulsions, 752
Thiamine metabolism, urinary pyramin in, 469
Thiocyanate, renal tubular reabsorption of, in normal man, 815
Thrombocythemia, serotonin activity of blood in, 759
Thyroid therapy, protein-bound iodine in, 422
Time factor in atherosclerosis, 914
Tissue sections, fat emboli in, demonstration of, using Phosphin 3R, a water-soluble fluorochrome, 321
Tobacco smoking, effects of, on ventilatory function in bronchial asthma and obstructive pulmonary emphysema, 455
Tolerance tests, vitamin B_{12}, application in American and Mexican subjects, 406
Toxicity of contaminated bank blood, 696
Transfusion of citrated blood, massive, circulatory derangement following, experimental studies of, 184
  repeated, multiple antibody response to, 93
Transfusions, platelet, utilizing plastic equipment, 196
Trauma, malnutrition after, effect of testosterone propionate at various protein and calorie intakes in, 732
Traumatic injury, blood lipoproteins in, 603
Trypsinated human erythrocytes, normal serum panagglutinin activity against, studies on. III. Panagglutinin titers in infants and children, 208
Tryptophan test for tuberculous meningitis, re-evaluation of, 463
Tubeless method of gastric analysis, evaluation of, 340
Tuberculous meningitis, tryptophan test for, re-evaluation of, 463
Type C influenza virus. I. Studies of the virus and its distribution, 31
  II. Intranasal inoculation of human individuals, 43

U

Urinary excretion, determination of gastric secretory function by measurement of, 335, 340
  of vitamin B_{12} by Mexican and American subjects, 407
  values, twenty-four-hour, a correction factor for determination of, 798
Urinary—Cont'd
  pepsinogen excretion in duodenal ulcer patients, 338
Urine and plasma, inulin in, determination of, by anthrone, 475
  and serum, vitamin B_{12} in, studies following oral and parenteral administration, 143
  creatine and creatinine in, determination of, 798
  primary amines in, of normotensive and hypertensive subjects, 620
Uropepsin assay, improved technique for, 165
  excretion in health and disease, 335

V

Vaponefrin, effect of, on ventilatory function in bronchopulmonary disease after smoking, 458
Ventilatory function in bronchial asthma and obstructive pulmonary emphysema, effect of cigarette smoking on, 455
Versene, effect of, on copper metabolism in hepatolenticular degeneration, 780
Viral hepatitis, acute, ACTH therapy in, 48
  with and without adrenocorticotrophin infusion, steroid excretion patterns in, 58
Virus, influenza, Type C, intranasal inoculation, 43
  studies and distribution of, 31
Viruses, poliomyelitis, propagation in vitro of, studies on. V. The application of strain HeLa human epithelial cells for isolation and typing, 286
  preservation of, small drying apparatus for, 489
Vitamin B_{12} and folic acid, effect of, on nucleic acid composition of bone marrow in megaloblastic anemia, 905
  and gastric juice, quantitative relationship between, 317
  in serum and urine, studies following oral and parenteral administration, 143
  tolerance tests, application in American and Mexican subjects, 406

W

Washing and serum albumin, effects of, upon erythrocytes. I. Upon morphology as seen with phase microscopy and with polarized light, 518
  II. Upon the internal movements of erythrocytes, 527
Wilson's disease, effect of drugs on copper metabolism in, 774
